

Faculty Assistant

Faculty Assistant Application

This program is for students who have completed the 10th and 11th grades and would like to serve as a Faculty Assistant to a Summer Enrichment instructor. This is a meaningful opportunity for those students who are looking for community service options, that look so good on college and scholarship applications, to get one. There is no stipend.

Selected students will be given the opportunity to work as assistants to faculty members in an area at which they excel. It will be necessary for students applying to have recommendations from their home school counselor **and** a faculty member from their home school in the area they wish to work. The students will work at our Queensbury campus for the entire three-week period, Monday through Thursday. (Please call 743-2238 for program dates.) Hours may vary.

A certificate will be given to the student at the end of the program stating the area in which the student worked and the hours.

Applications with recommendations must be received by **the last Friday in May** for consideration for the upcoming summer. Students we are able to place in a class will be contacted for an interview.
